

***What do you know about Tensors? Briefly describe the various verticals under Tensors team?***

Tensors is a non-profit organization founded by students of IIT Madras. The primary aim of Tensors is to 'help and create sustainable and impactful changes in society' by providing several technical and practical solutions to the problems faced by different innovators and NGO's. Throughout the year, Tensors conduct various exams and counselling programs (like the one for Joint Entrance Examination and JOSAA) and the funds gathered in these programs are used in conducting several social initiatives and campaigns. As of now, Tensors have come up with several mind-boggling initiatives like, Decov App (a mobile app to connect blood, plasma, oxygen and food donors with the needy), Imprints Web page (a humanitarian initiative by calicut medical college students), Navsahyog App etc. Verticals available under Tensors include Tenment (Products and services for JEE and JOSAA), TENSOCI (Tensors Social Campaign Initiatives - the techno-social incubator that provides tech solutions to the innovators and NGOs) and Public Relations (Outreach, Branding, Visibility and Social Campaign).
